Property Description

Imagine living on an eco-farm in beautiful and secluded Cabo Matapalo. This property features stunning Golfo Dulce ocean views, including where the waves break at Pan Dulce. This 27 hectare property also features your own rainforest jungle, small waterfalls, and swimming holes. It's the perfect property for a small hotel business or vacation rental. Our favorite part of this property is having a 100% natural, lush rainforest on-site. In fact, it's part of the protected "biological corridor," which connects Corcovado National Park to the Golfo Dulce Forest Reserve. The 27 hectare property is surrounded by towering trees, spider monkeys, sloths, and five species of jungle cats. This includes jaguars, pumas, and ocelots. You also have your own seasonal waterfalls and swimming holes on-site. This is a one-of-a-kind nature lover's paradise with two of Costa Rica's best nature lodges, Lapa Rios and Bosque Del Cabo as your neighbors.
