Property Description

This 6 acre / 2 hectare property is a rare find, considering its location. Perched, a refreshing 300 feet above sea level, as well as five minutes from the Uvita town center, you can understand why we think this is a rare gem. Up a well maintained road from the highway, after a quick three miles you will find this lot privately nestled in a wonder area of Uvita. The main building lot is spacious enough for a large home and a pool, with extra space for any other additional needs, the rest of the property is jungle. There is a seasonal creek that goes through the land. The big plus is the wonderful window view of the Pacific Ocean through the trees. Your view looks out upon the Tres Hermanas Islas/ The Three Sisters Islands with their rock reefs between to give you that beautiful blue with the white water crashing along the edges of the islands and reefs. This is quite a special price and location ready for the house of your dreams to be built.
