Property Description

This “like-new” home was built in 2018 and is designed to offer carefree, off-grid living. Electricity is generated by solar panels which are stored within 8 batteries! If there was ever a need, a back-up generator is also available. Water is supplied from a legal ASADA water source, but this property also has natural water springs and 2 small river streams to tap into. Resources that could easily be used to create a tilapia fishpond if desired. Over the last 13 years, the owners along with a trusted worker who is also a nearby neighbor have lovingly planted “hundreds” of fruit trees, and a fresh vegetable garden. The land is gentle with expertly terraced areas for fruit production. To name only a few: Anone, mamon chino, orange, lemons, breadfruit, sweet lemons, avocados, starfruit, sweet mandarin orange, coconut, pehibaye, guanabana, aviut, papaya, mangos, bananas, and yuca - a root tuber/potato.
